Marcos, just a heads up... to my knowledge, we have not been cleared to give any of our data to the State. Before sharing the data with anyone you should first talk with Fetzer.

Things on this project are not being handled in the normal manner.

Kelley,

Yes he can. He just need to login info.

Marcus,

If you need the info give me a call and I will provide the login info.

Hi John -

Have a question for you ... Can any of the R3 folks get onto the FTP site for Dimock?

Marcos Aquino will be helping review the RAD data. I thought that the FTP site would be the best place to find most of the reports.

As of today, I believe that Forte Meade has posted all RAD data (with the exception of Thorium (1200002 Alpha Spec. - Thorium). SERAS folks are still working on uploading to Scribe database. With the exception of the Thorium - all the data should be in Scribe by the middle of next week. Once it is - we can generate some spreadsheets that would likely be helpful in reviewing the data.

The PDF narrative reports can be found on the FTP site. Go to Dimock folder - then EPA LAB will be in two folders: February 2012 and March 2012. Each of these folders contains the RAD data in the NAREL folders.

Thanks - Kelley
